

## RE-ADVERTISEMENT - REQUEST FOR PROPOSALS

### **RFP NO.KN005/2019 - CONSULTANCY TO DEVELOP UGANDA'S NATIONAL GREENHOUSE GAS INVENTORY (GHGI) AND MONITORING, REPORTING AND VERIFICATION (MRV) SYSTEM**

Conservation International Foundation (hereinafter referred to as "Conservation International"), is issuing a Request for Proposals for Consultancy Services.

**Background:** On 22<sup>nd</sup> May 2018, the Global Environment Facility (GEF) Secretariat approved a mid-sized project "Strengthening the Capacity of Institutions in Uganda to Comply with the Transparency Requirements of the Paris Agreement" See more about the project at [CBIT Uganda](#). The project is funded through The Capacity Building Initiative for Transparency (CBIT), established at COP 21 to support developing countries to enhance transparency requirements as defined in Article 13 of the Paris agreement in a timely manner. The project is executed by the Ministry of Water and Environment Climate Change Department (CCD MWE) and the Africa Innovations Institute (AfrII).

The main objective of this project is to support institutions in Uganda to respond to the Transparency Requirements of the Paris Agreement. The project has three main components:

- i. Establish & strengthen institutional arrangements for robust GHG emission inventory and MRV System,
- ii. Build the capacity of key stakeholders to collect, process and feed gender disaggregated data into the GHG emissions inventory and MRV system and
- iii. Test and pilot the GHG emission inventory and MRV system.

The complete RFP document containing all the necessary information for interested Applicants can be downloaded by clicking: <http://vitalsigns.org/blog/request-proposal>

Interested applicants can submit their proposals to: [procurementaffd@conservation.org](mailto:procurementaffd@conservation.org) on or before **on 20<sup>th</sup> September 2019(16:00 PM (EAT))**.

NB: All applicants are expected to exercise the highest standards of conduct in preparing, submitting and if selected, eventually carrying out the specified work and in accordance with CI's Code of Ethics.

## ETHICS STANDARDS

Conservation International's reputation derives from our commitment to our core values: Integrity, Respect, Courage, Optimism, and Passion and Teamwork. CI's Code of Ethics (the "Code") provides guidance to CI employees, service providers, experts, interns, and volunteers in living CI's core values, and outlines minimum standards for ethical conduct which all parties must adhere to.

**Any violations of the Code of Ethics should be reported to CI via its Ethics Hotline at [www.ci.ethicspoint.com](http://www.ci.ethicspoint.com).**

CI relies on the personal integrity, good judgment and common sense of all third parties acting on behalf, or providing services to the organization, to deal with issues not expressly addressed by the Code or as noted below.

### Integrity:

- Act in good faith, responsibly, with due care, competence and diligence and maintain the highest professional standards at all times.
- Comply with all contractual terms as well as all applicable laws, rules and regulations, domestic and international, in every country where Services are carried out.
- Provide true representation of all Services performed.
- Never engage in any of the following acts: falsification of business document or receipts, theft, embezzlement, diversion of funds, bribery, or fraud.

### Transparency:

- Avoid conflicts of interest and not allow independent judgment to be compromised.
- Not accept gifts or favors from sub-contractors, suppliers or other 3<sup>rd</sup> parties that would negatively impact the provision of Services to CI.

### Accountability:

- Disclose to CI, at the earliest opportunity, any information you have or become aware of, that may result in a real or perceived conflict of interest or impropriety.
- Implement activities, provide Services, and manage staff and operations in a professionally sound manner, with knowledge and wisdom with the goal of a successful outcome per the terms of this Agreement.

### Confidentiality:

- Not disclose confidential or sensitive information obtained during the course of your work with CI.
- Protect confidential relationships between CI and other 3<sup>rd</sup> parties.

### Mutual Respect and Collaboration:

Engage with indigenous peoples and local communities in which CI works in a positive and constructive manner that respects the culture, laws, and practices of those communities, with due regard for the right of free, prior and informed consent.

## TABLE OF CONTENTS

### SECTION1: INSTRUCTIONS AND GENERAL GUIDANCE

- 1.1 Introduction
- 1.2 Required Skills and Experience
- 1.3 Instructions for Offerors
- 1.4 Location of Task/Applicable Trips
- 1.5 Chronological List of Events
- 1.6 Submission and Requirement
- 1.7 Evaluation and Basis for Award

### SECTION 2: Scope of Work

- 2.1 General Background
- 2.2 Objectives
- 2.3 Key Tasks
- 2.4 Specific requirements for the consultants
- 2.5 Deliverables/Estimated Outputs

## SECTION1: INSTRUCTIONS AND GENERAL GUIDANCE

### 1.1 Introduction

CI Africa Field Division (CI AfFD), is soliciting proposals from eligible and interested individual consultants and firms to undertake consultancy.

### 1.2 Required Skills and Experience

CI requires consultant(s) with senior-level qualifications to perform the work described above.

- i. Individuals/firms will have, at least a minimum of 10 years' experience in the field of climate change, environment conservation/management, Greenhouse gas concepts and Measuring, Reporting and verification.
- ii. Substantial experience working in the following areas under the climate change, biodiversity and land degradation, sustainable forest management focal areas, as well as demonstrable experience working with the Government of Uganda is a major advantage.
- iii. The team should demonstrate previous experience and work in training on GHGI and MRV in developing country context preferably Africa.
- iv. Demonstrated experience and evidence of supporting UNFCCC reporting

We welcome international/national applications from individuals and registered consulting firms.

### 1.3 Instructions for Offerors

1.3.1. Submission Deadline: Proposals must be emailed to [procurementaffd@conservation.org](mailto:procurementaffd@conservation.org), no later than **20<sup>th</sup> September 2019 (4:00 PM EAT)**. Proposals should be correctly identified with RFP number. **RFP KN005/2019**

1.3.2. Inquiries: Interested Offerors can submit their questions to [procurementaffd@conservation.org](mailto:procurementaffd@conservation.org).

1.3.3. Restrictions on multiple submissions: Each offeror may submit only **one** proposal. Submission of multiple proposals will result in disqualification of the interested offeror.

1.3.4. Communications: Upon issuance of this RFP, CI AfFD, its representative(s), or partners will not answer questions or otherwise discuss the contents of this RFP with any potential Offerors or their representative(s), except for the written inquires described in sub-part 1.3.1 above. Attempts to ask questions by phone or in person will not be allowed or recognized as valid. Failure to observe this restriction may disqualify the offeror.

1.3.5. Amendments: Any amendment to this request for proposal will be communicated to all interested Offerors via email.

1.3.6. Validity Period: Offerors proposals must remain valid for 90 calendar days after the RFP deadline.

1.3.7. Terms of contracts: This is a request for proposals only and in no way, obligates CI AfFD to award a contract. In the event of contract negotiation with a successful offeror, CI AfFD will issue a service agreement (hereinafter referred to as “the contract”). The contract terms and conditions are non-negotiable.

#### **1.4 Location of Task/Applicable Trips**

The consultant shall work from their base of operations and will be required to make visits to identified stakeholders’ organizations in Uganda as necessary.

#### **1.5 Chronological List of Events**

The following calendar summarizes important dates in the solicitation process. Offerors must strictly follow these deadlines.

<b>RFP published</b>	<b>30<sup>th</sup> Aug 2019</b>
<b>Deadline for written questions</b>	<b>13<sup>th</sup> September 2019</b>
<b>Quotations due date</b>	<b>20<sup>th</sup> September 2019</b>

#### **1.6 Submission and Requirement**

The proposals must address the following information at the minimum (Financial & Technical) to CI AfFD. The maximum number of pages for technical proposal is 3 and **financial must be shared in excel**.

##### **Technical Proposal:**

The Technical Proposal should describe in detail how the offeror intends to carry out the requirement described in Section 2, Scope of Work (SOW). The technical proposal should demonstrate a clear understanding of the work to be undertaken and the responsibilities of all parties involved.

a. Cover Letter: Offerors should include a cover letter indicating the Offerors interest for the assignments listed in Section III. The cover letter should provide a complete mailing address, electronic mail address(es) and telephone numbers. It should clearly list the name of offeror(s) submitting the proposal

b. Management, Key Personnel, and Staffing Plan. This section should include CV(s) of consultant(s) that will be assigned to the implementation of the proposed methodology.

c. Technical Approach, Methodology and Detailed Work Plan. This part shall be between 3 and 5 pages long but may not exceed 5 pages.

1.4.2. Past performance: The Offerors must provide 3 past performance references of similar work (Under contract or sub-contract). The Offerors must provide contact information of companies including Name, Point of Contact who can speak to the offeror’s performance, and address of the companies.

**Financial Proposal:**

1.4.3 The cost proposal is used to determine which proposals are the most advantageous. The price of the contract to be awarded will be an all-inclusive. No profit, fees, taxes, or additional costs can be added after award. Nevertheless, for the purpose of the proposal, Offerors must provide a detailed budget showing major expense line items.

**Format:** budgets must be prepared and submitted in Microsoft Excel and explicitly show all units (e.g., labour days), unit costs (e.g., loaded daily rates), and total costs. Excel files should be “unlocked” and show all calculations.

Consultant Designation/Title	No. of Personnel	No. of workdays	Unit rate	Total fees
Fees- ie consultancy				
Sub-totals		xxx days		yyy
Applicable taxes				
Sub Total				XXXX
Cost-reimbursable items	No. of Personnel	No. of workdays	Unit rate	Total fees
Flight				
Transport/taxi				
Accommodation				
Total reimbursables				XXX
TOTAL				XXX

## 1.7 Evaluation and Basis for Award

1.7.1. Award: CI AfFD will award a contract to the Offerors whose proposals is considered to be the Best Value to CI AfFD, Technical factors, and price will be considered.

1.7.2. Award: CI AfFD reserves the right to consider Offerors qualifications, references; conduct studies and other background check as necessary to evaluate any response; request additional relevant information; disqualify offer based on unsatisfactory reference checks, reports and records of service.

Criterion	Points
<p><b>Demonstrated experience</b> working with developing country governments in Africa in the following thematic areas: climate change, biodiversity, land degradation and sustainable forest management;            Demonstrated experience in developing Monitoring Reporting and Verification System.            Experience working with the government of Uganda is an added advantage.</p>	20
<p><b>Relevant technical expertise:</b> technical experience in development of Green House Gas Inventories and MRV Systems; experience conducting trainings related to GHG including GHG Inventory Development. Specifically, proven technical experience in the following areas:</p> <ul style="list-style-type: none"> <li>• Methodologies and tools for collecting, documenting and archiving GHG data for the AFOLU, waste, energy, transport and industry sectors,</li> <li>• IPCC Inventory software for GHG emission calculation and general computation of GHG,</li> <li>• Data requirements for GHG Inventory development and key categories</li> <li>• Key Category Analysis, and sector GHG integration</li> <li>• <b>Ability to calculate GHG emissions</b> estimates using agreed upon Guidelines (including methods, collection of AD, EFs and other parameters).</li> <li>• Ability to calculate <b>uncertainty</b></li> <li>• <b>Ability to prepare and report recalculations</b> in accordance with the 2006 IPCC Guidelines and relevant reporting formats</li> <li>• Ability to report emissions using <b>agreed upon formats</b></li> <li>• <b>Ability to implement QA/QC procedures</b> according to 2006 IPCC guidelines</li> <li>• <b>Ability to compile a national GHG Inventory for Uganda.</b></li> </ul>	60
<p><b>Appropriate budget,</b> demonstrating appropriate allocation of labor days in relation to tasks and deliverables; appropriate consultant daily rates in relation to qualifications; appropriate other direct costs in relation to the scope of work; and overall cost effectiveness.</p>	20
<b>Total</b>	<b>100</b>

## SECTION 2: SCOPE OF WORK

### CONSULTANCY TO DEVELOP UGANDA'S NATIONAL GREENHOUSE GAS INVENTORY (GHGI) AND MONITORING, REPORTING AND VERIFICATION (MRV) SYSTEM.

<b>Project Title:</b>	Strengthening the Capacity of Institutions in Uganda to Comply with the Transparency Requirements of the Paris Agreement (CBIT Uganda)
<b>Project Location:</b>	Kampala, Uganda
<b>Location of Consultancy:</b>	Home based with travel to Kampala, Uganda
<b>Languages Required:</b>	English
<b>Duration of consultancy:</b>	6 months
<b>Posted on:</b>	<b>30<sup>th</sup> August 2018</b>
<b>Deadline:</b>	<b>20<sup>th</sup> September 2018</b>
<b>Electronic Submission:</b>	<a href="mailto:procurementaffd@conservation.org">procurementaffd@conservation.org</a>

#### 1. GENERAL BACKGROUND

Conservation International (CI) is a non-profit public charity conservation organization, set up in 1987, with headquarters in Arlington, Virginia. It is one of the largest conservation organizations headquartered in the US, with close to 1,000 employees worldwide. Its vision is to protect nature and its biodiversity, for the benefit of humanity.

On 22<sup>nd</sup> May 2018, the Global Environment Facility (GEF) Secretariat approved a Medium Sized Project (MSP) "*Strengthening the Capacity of Institutions in Uganda to Comply with the Transparency Requirements of the Paris Agreement*", see more about the project at [CBIT Uganda](#). The project is funded through the Capacity Building Initiative for Transparency (CBIT), established at COP 21 to support developing countries to enhance transparency requirements as defined in Article 13 of the Paris agreement in a timely manner. The project is executed by the Ministry of Water and Environment Climate Change Department (CCD MWE) and the Africa Innovations Institute (AfrII).

The main objective of the CBIT Uganda project is to support institutions in Uganda to respond to the Transparency Requirements of the Paris Agreement. The project has three main components:

- i. Establish and strengthen institutional arrangements for robust Green House Gas (GHG) emission inventory and MRV System;
- ii. Build the capacity of key stakeholders to collect, process and feed gender disaggregated data into the GHG emissions inventory and MRV system and;
- iii. Test and pilot the GHG emission inventory and MRV system.

This Consultancy will contribute towards realization of the following specific outputs provided in the Project Document (ProDoc) (refer to Table 1). The full project document can be accessed at: [CBIT Uganda](#).

**Table 1: Indicative outputs that the consultancy will contribute towards realization\***

COMPONENT	OUTPUTS
<p><b>COMPONENT 2: Building capacity of key stakeholders to collect, process and feed gender disaggregated data into the GHG emissions inventory system</b></p>	<p><b>Output2.1.1:</b> Protocols for data collection and processing developed and certified</p> <p><b>Output2.1.2.:</b> Field data teams from the key emission sectors convened and trained in collection, processing and transmission of GHG data.</p> <p><b>Output 2.1.3.:</b> Staff from the hubs and MWE/CCD trained in domestic MRV systems, tracking NDCs, enhancement GHG inventories and emission projections</p> <p><b>Output 2.1.4.:</b> Lessons learned, and best practices scaled out through exchange programs for stakeholders on transparency activities.</p>
<p><b>COMPONENT 3: Testing and piloting the GHG emission inventory and MRV system.</b></p>	<p><b>Output3.1.1:</b> Data for GHG inventory and MRV system collected and fed into the global CBIT coordination platform</p> <p><b>Output3.1.2:</b> National inventory Green House Gas emissions (by sources) and by removals (by sinks) in place</p> <p><b>Output3.1.3:</b> National Inventory of Green House Gas emissions (by sources) and by removals (by sinks) made publicly available.</p>

*\*These specific target outputs are indicative.*

## 2. SCOPE OF WORK

The objective of this consultancy is to develop a National Green House Gas Inventory (GHGI) and MRV System and subsequently conduct sectoral trainings in GHG emissions. The trainings will focus on the following key emission sectors: Agriculture, Forestry, Transport, Energy, Waste, and Industry.

The consultant will work closely with the Africa Innovations Institute (AfrII), the Climate Change Department Ministry of Water and Environment, Conservation International and other partners in carrying out the tasks listed below to achieve outputs outlined in Table 1:

## 3. KEY TASKS

Under the overall supervision of CBIT Project Manager at the Africa Innovations Institute (AfrII), Conservation International’s Senior Regional Director – Conservation Science and Senior Technical Manager and in close collaboration with the Focal Point at the Climate Change Department of the Ministry of Water and Environment (MWE-CCD), the consultant will perform the following tasks:

- I. **Baseline study:** The consultant will undertake initial analyses and will prepare a baseline study report that will include the following items:
  - a) Review available sectoral GHG database, and their relevance in accordance with international guidelines; and review how to develop and collect new database from available sources;
  - b) Outline suitable GHG calculation approaches that can be operated in Uganda based on the data availability;
  - c) Present proposed national MRV system including GHG inventory, reporting regime for mitigation actions and a verification framework for the key GHG sectors.

The baseline study report will be submitted to the Africa Innovations Institute (AfriI), Conservation International, the Climate Change Department of the Ministry of Water and Environment (MWE-CCD) and other partners for review and approval.

- II. **Pilot testing:** The consultant will undertake pilot-testing opportunities of the proposed analytical approaches for the GHG emission sectors and will evaluate the lessons learnt with focus on:
  - a) Data availability
  - b) Overall reliability of the assessment (which important factor for verification of the results)
  - c) Time and resources needed for conducting the inventory and calculations
  - d) Recommendations for future improvements

The consultant will prepare a draft report describing lessons from pilot-testing.

- III. **Stakeholder Consultation:** The Consultant will conduct stakeholder engagement using relevant tools. Additionally, a technical stakeholder workshop should be organized to bring together key sectoral experts having either relevant expertise and/or management responsibilities related to the key emissions sectors and GHG calculations.

The consultant team will prepare a brief report covering discussed contents in the consultation workshop.

- IV. **Support the development of GHG emissions inventory and guidelines by building capacity of the GHG sectors identified in (VI) below.** The consultants will provide tools and templates that will guide these institutions on how to establish institutional arrangements for preparing national inventories and related UNFCCC reporting that promotes transparency, accuracy, consistency, comparability and completeness. The consultant will train the stakeholders on collection processing and interpretation of GHG data and enhancement of GHG inventories and emission projections in the key emission sectors. They will also train on MRV systems, tracking NDCs, and UNFCCC reporting.

- V. **Compile a Greenhouse Gas Inventory for Uganda.** The consultant will lead compilation of sector GHG Inventories and compile a national GHG Inventory for Uganda.

- VI. **The consultant(s) will lead the capacity building activities of at least 40 staff (as laid out in section 5 of this ToR) at institutional level (MWECCD), personnel and multi-sectoral actors (i.e., Energy, Industrial Processes and Product Use, Agriculture, LULUCF and Waste) level.** The trainees are expected to be drawn from the Government, academic and civil society sectors as

appropriate. The training should be complementary to previous trainings conducted and should not duplicate identified previous trainings. To improve inventory skills and immediately apply skills to real problems, trainings should focus on practical skills, applying real data and information from Uganda, with the goal of directly supporting upcoming national and international reports and submissions. The trainings are expected to involve crosscutting GHG inventory processes, measurement, reporting and verification protocols and policies and NDC-MRV methods.

#### 4. DELIVERABLES/EXPECTED OUTPUTS

- i. **Inception report** detailing the understanding/ interpretation of the ToRs; the methodology of carrying out the assignment; work plan and implementation schedule as agreed upon with CI, AfrII, and CCD-MWE submitted 10 days after signing of contract.
- ii. **Baseline study report** will be submitted to the Africa Innovations Institute (AfrII), Conservation International, the Climate Change Department of the Ministry of Water and Environment (MWE-CCD) and other partners for review and approval. The report should cover the following:
  - a) Review available sectoral GHG database, and their relevance in accordance with international guidelines; and review how to develop and collect new database from available sources;
  - b) Outline suitable GHG calculation approaches that can be operated in Uganda based on the data availability;
  - c) Present proposed MRV system including GHG inventory, reporting regime for mitigation actions and a verification framework for the key GHG sectors.
- iii. **Report outlining lessons learnt from pilot testing:** The consultant will undertake pilot-testing opportunities of the proposed analytical approaches for the GHG emission sectors and will evaluate the lessons learnt with focus on:
  - a) Data availability
  - b) Overall reliability of the assessment (which important factor for verification of the results)
  - c) Time and resources needed for conducting the calculations
  - d) Recommendations for future improvements
- iv. **Stakeholder Consultation Report:** The consultant team will prepare a brief report covering discussed contents in the consultation workshop and other engagements with key stakeholders.
- v. **Greenhouse Gas Inventory (GHGI):** The consultant will lead compilation of sector GHG Inventories and compile a national GHG Inventory for Uganda.
  - a) Sector Inventory reports from the 5 NDC sectors
  - b) A National GHG Inventory developed for Uganda
- vi. **A National Monitoring, Reporting and Verification (MRV) system** developed for Uganda
- vii. **GHG Trainings:**
  - a) *Training schedule and milestones:* The consultant should train at least 40 people as per the breakdown below;

**Table 2: Target trainees per sector**

<b>Sector</b>	<b>Number of trainees</b>
Energy	6
Transport	6
IPPU	6
AFOLU	7
Waste	6
CCD	6
PMU	3
Total	40

- b) *A training manual* on field data collection, processing and transmission across the key emission sectors (Two hard copies and soft copies).
- c) *A training plan* on field data collection, processing and transmission across the key sectors (Two hard copies and soft copies).
- d) Undertake sector training on training needs identified in section 3 on Key tasks.

(Please note detailed tasks and deliverables will be discussed and agreed upon during contract negotiation)

## **5. REQUIRED SKILLS AND EXPERIENCE**

CI requires consultant(s) with senior-level qualifications to perform the work described above.

- v. Individuals/firms will have, at least a minimum of 10 years' experience in the field of climate change, environment conservation/management, Greenhouse gas concepts and Measuring, Reporting and verification.
- vi. Substantial experience working on projects under the following thematic areas: climate change, biodiversity and land degradation, sustainable forest management focal areas, as well as demonstrable experience working with the Government of Uganda is a major advantage.
- vii. The team should demonstrate previous experience and work in training on GHGI and MRV in developing country context preferably Africa.
- viii. Demonstrated experience and evidence of supporting UNFCCC reporting

We welcome international/national applications from individuals and registered consulting firms.

### **Additional key requirements for the consultants:**

#### **a. Agriculture, Forestry and other land use**

The consultant should be conversant with training in;

- Methodologies and tools for collecting, processing, documenting and archiving GHG data for agriculture and forestry sectors,
- IPCC Inventory software for GHG emission calculation and the data requirements,
- Knowledge of systems for data collection, processing and emissions estimations that are attributable to livestock, soil and fertilizer management, rice paddy cultivation, land

conversions, biomass stocks (above and below ground), wood extraction and fire in all land units

- Key Category data collection, analysis and computation of GHG emissions and removals for agriculture and forestry sub sectors
- Data disaggregation for GHG inventory e.g. Livestock breeds, feeds, manure management, fertilizer types etc.
- Land use and land use change mapping within and outside protected areas (forest land, cropland, grassland, wetland, settlements etc.)
- Formulation of relevant country specific emission factors
- The IPCC guidelines and good practice required for GHG inventory
- Uncertainty analysis for the agriculture and forestry sector
- Measuring Reporting and Verification of GHG data in all agriculture and forestry sub sectors

#### **b. Energy, Transport and Industry**

The consultant should demonstrate training expertise in areas of;

- Methodologies and tools for collecting, documenting and archiving GHG data for the energy, transport and industry sectors
- IPCC Inventory software for GHG emission calculation and general computation of GHG in the energy, transport and industry sectors
- Data requirements including fuel type and amounts disaggregation in all energy, transport and industry subsectors (e.g. including industrial subcategory such as manufacturing Industries, chemical industry, food processing, mining, wood processing, construction and textile industry; types of vehicles, fuel quantities and distance covered by vehicles etc.). Fuel combustion activities (Energy industries, Transport, manufacturing industries and construction)
- Fugitive emissions from fuels (solid fuels, including (firewood and charcoal), oils and natural gas) and monitor in country fuel stock change
- Carbon dioxide transport and storage
- Key Category Analysis and sector GHG integration
- The IPCC guidelines and good practice required for GHG inventory
- Knowledge on the difference between sectoral approach and reference approach in GHG estimation for the energy and transport sectors
- Uncertainty analysis for the energy, transport and industry
- Formulation of relevant country specific emission factors
- Measuring Reporting and Verification of GHG data in all energy, transport and industry sectors

#### **c. Waste**

The consultant should demonstrate experience and knowledge in delivering trainings in;

- Solid waste disposal and management
- Biological treatment of solid waste
- Incineration and open burning of waste
- Wastewater treatment and discharge including industrial effluents
- Methodologies and tools for collecting, documenting and archiving GHG data for waste sector; including designing systems and tools to collect data on wastewater generated, quantities of solid waste (volume and density), waste type by composition (biodegradable and nonbiodegradable)
- Data requirements including waste type disaggregation in all waste sub sectors
- Key Category Analysis, GHG emission calculation and general computation of GHG in the waste sector
- The IPCC guidelines and good practice required for GHG inventory for the waste sector

- Uncertainty analysis for the waste sector
- Formulation of relevant country specific emission factors for the waste sector
- Measuring Reporting and Verification of GHG data in all waste sub sector.

d. **Climate Change Department, coordination institutions and data managers**

The consultant should demonstrate experience and knowledge in delivering trainings in;

- Coordination skills for effective collection processing and reporting of GHG data and climate change information
- GHG inventory and reporting concepts and procedures including GHG data entry, data standardization, data Quality Assurance and /Quality Control,
- Data management including GHG collection, computation, conversion factors, emission factors and their application and use of IPCC tools
- Measuring Reporting and Verification of GHG data in all Sectors

**LOCATION OF TASK/APPLICABLE TRIPS**

The consultant shall work from their base of operations and will be required to make visits to identified stakeholder organizations in Uganda as necessary.
